STRAYER UNIVERSITY

ms consultants provided architectural services for the design of a single-story, 17,014-square-foot, vocational classroom building for Strayer University. The facility is located in Morrisville, a suburb of Raleigh, North Carolina.

Services provided included architecture, programming, interior design, space planning, electrical and mechanical engineering, site civil study/design, landscape architecture and construction administration.

The building program consisted of lecture halls, vocational classrooms, administrative and faculty offices, IT labs and classrooms, multipurpose workshops, student lounge, facility library, snack bar, and common restrooms.
