## CARDINAL MOONEY HIGH SCHOOL RENOVATION

---

ms consultants was the design consultant for the repair and modernization of the Cardinal Mooney High School. The \$5 million renovation project focused on the safety of the 500+ students and staff while also reducing operational costs and improving energy-efficiency.

The school, originally constructed in 1955, began to show its age, including an outdated roof, leaking windows, and inefficient lighting.

The renovations to Cardinal Mooney High School were strategically aligned during three sequential summer breaks. This allowed the upgrades to be performed without any disruptions to students. All renovations were completed by the 2017-2018 school year.

---
